

# Simplify Data. Share Insight.

*Easily integrate GIS, Outage Management and Smart Grid systems so you can quickly and easily put the right data in the right hands when it matters most.*

mPower Integrator™ and mPower OMS™ are uniquely powerful, yet easy to use browser-based mapping/GIS tools that facilitate; asset management, outage response, load analysis/balancing, trace flow analysis and more.

**Web-based Portal  
Seamlessly Accesses:**

**CIS • GIS • OMS  
AMR/AMI • MDM • IVR**

**Secure distribution  
of maps and data.**

The software easily connects any compliant database (ODBC) allowing secure access, reporting and distribution of maps and data. mPower's software solutions seamlessly interface with AMR/AMI, AVL, CIS, IVR, MDM, OMS, and other Mapping, Modeling and Staking systems. This gives you access to all of your various systems (and their data) through one simple, "smart map" interface.
