Easy to Use

Easily create, define, and administrate resources (personnel, equipment and materials) processes (work-flows, status, and notifications).

Take Control of Your Work Orders

Simple dashboard allows administrators, managers, and end-users to find, assign and update existing work orders based on any search criteria, status, or location. Instantly know "Who's got the ball?"

Pole #: 01558 Outage: Yes No Outage Duration: 3 Circuit: Circuit 1

Cause: Pole Kill Billable: Yes No Town: Street: Maple Street

Trouble As Reported: Vehicle hit pole in snowstorm.

Foreman Remarks:

Intuitive Foreman/Crew Worksheets

Give field personnel, contractors, supervisors, and support staff the ability to easily update time, equipment and materials as it applies to individual projects or work orders.

Save Time with Templates

Common activities can be saved as templates, minimizing initial setup costs and streamlining ongoing documentation. Templates for Scope of Work, Startup Checklists and Safety Forms can be memorialized and attached to work orders as needed.

Browser Based

WMS works on any connected device and integrates seamlessly with mPower's other smart utility solutions.
